

WOLVERINE

FLUID POWER, INC.

YOUR PARTNER IN PRODUCTIVITY

6515 HADLEY • RAYTOWN • MISSOURI 64133

Some product lines are not available in all areas. Please call for verification

Since 1980, the goal of Wolverine Fluid Power has been to provide our customer with superior pneumatic and specialty products, a high level of technical expertise and product availability from an outstanding local inventory. Wolverine provides design, layout, packaging and testing for virtually any kind of pneumatic device. Our years of experience and technical competence assure you of a device that will work right the first time, and every time.

Huge array of extrusions and accessories allow you to build equipment frames, guards and housings. Extremely durable and versatile. Eliminates the need for costly fabrication.

Push to fit connectors, banjo fittings, cartridge fittings, flow controls, quick-exhaust valves, needle valves, check valves, tubing assemblies and much more. High quality Ni plated brass fittings.

Arrow Pneumatics produces the most complete air-line management systems. Not only filters, regulators, and lubricators, but also stage air drying systems, refrigerated and Hi-Temp systems. Virtually any product necessary to manage and control compressed air systems.

Stainless Steel Valves: VA Series, ARIES-ZEUS series angle-seat valves. Automated Ball Valves with electrical or pneumatic actuation, weatherproof, explosion-proof. 3/8 to 2 ports.

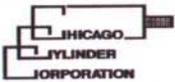

Aurora is the world leader in rod end and spherical bearings, with a full range of products from economy commercial to MS approved aerospace bearings. The widest selection on inch or metric bearings in the industry.

Manufacturers of a full line of safety switches. electromechanical and proximity switches. Plastic and metal bodied switches and sensors.

Canfield Connector: Your best resource for electronic interconnection devices, electronic timers, sensors, modules and specialty electronic devices for the fluid power industry, including Device-Net.

Chicago Cylinders meets all your cylinder requirements. Single and double acting cylinders. 1/2 to 2 SS cylinders in pneumatic or hydraulic. NFPA tie-rod styles, reduced profiles, non-rotating, and die-lifters. Interchange replacements for Bimba, Springville and Fabco

America's leading producer of pneumatic and electronic control devices. Valves, cylinders, fittings, modular components, pushbuttons, stainless steel cylinders, electronic manifold cards, modular circuit manifold subplates.

DE-STA-CO Industries has been manufacturing quick-action clamps since 1930. More than 500 different models available for horizontal, vertical, pull, squeeze and straight-line clamping. There are also clamps developed to meet specific customer needs in manual and pneumatic versions.

Shock Absorbers

Numerous lines of industrial and special application shock absorbers and linear decelerators. Controls shock and vibration in shears, presses, high speed injection molding machines.

Firestone Airbags, Marshmallows, pickers and grippers. Heavy-lift capability, vibration isolation, actuation and pick-and-place applications for industry.

Hi-Cycle, NFPA interchangeable, round body cylinders. Heavy-duty NFPA tie rod cylinders, powered slides, air/oil tanks, check valves and flow controls.

Your single source for solenoid valves. More than 35,000 variations to handle virtually any liquid, gas, or steam. Direct acting or diaphragm types. 1/8 to 2 ports.

Cable-Trol cable cylinders, Trac-trol guided and support cable cylinders, Dura-master NFPA cylinders, Bal-Trol air balance hoists.

Valves specifically designed for the control of gas, fuel, air, water or steam in two principal configurations - Direct Lift and Pilot Assisted.

Pneumatic and electric driven actuators, control systems, ISO valves, metric VDMA cylinders. Rodless cylinders, linear drive systems, roller guides and proportional pressure regulators.
